

## Integrated Health, Safety, Environment and Quality Policy

CITIC Censa is a company dedicated to the design and manufacturing of heavy equipment and pressure vessels, which has implemented an Integrated Management System, based on the requirements established in the International Standards ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018, in the framework of its strategic planning, in order to increase the satisfaction of their clients; meet the expectations of shareholders and workers; respect and protect the Environment, Health and Safety of the people who form the company and prevent pollution in the scope of its activities.

The Company Management is committed to lead, maintain and improve this Management System, ensuring that all needed resources are available.

This commitment is specified in the following basic principles, which apply to all levels of the organization.

- Meet the needs and expectations of our clients and interested parties, as well as the regulatory and legal requirements applicable to the Quality of our products and services, and those related to Environment, Health and Safety in the scope of our activities.
- Prevent damage and deterioration of the Health and the Environment, becoming a model in our surroundings.
- Integrate the culture of work risk prevention and respect for the environment, which must be present in each new project, purchase and investment, each new product and, in short, in each action of everyone every day.
- Raising awareness on all company personnel about their contribution to the Management System efficiency, including the gains of a performance improvement, the promotion of training in order to improve their skills and abilities and the consequences of failing to meet legal or system requirements.
- Promote and facilitate consultation and active participation of personnel, collaborators and other interested parties, essential for the continuous improvement of the management system.
- Cooperation of the personnel in the observation and compliance with the norms and rules of prevention, in the detection of dangerous conditions and unsafe actions, informing them of their immediate superior, and providing those suggestions and preventive improvements to adopt in order to provide working conditions. safe and healthy for the prevention of injuries and health deterioration related to work and damage to property or assets of the company.
- Maintain a high level of innovation in the development and provision of our services, within the framework of a permanent continuous improvement system, so as to reduce, as far as possible, the environmental impacts and risks for our workers.
- Ensure and promote the continuous improvement of the Management System, in order to achieve complete compliance with the products and services requirements, and improve environment, health and safety management.
- Planning and implementing actions to address risks and opportunities, in order to increase the effectiveness of the Management System, obtain improved results and prevent negative effects.
- Act at all times within the strictest professional ethics.
